

The **AI Driven** Net Zero Platform

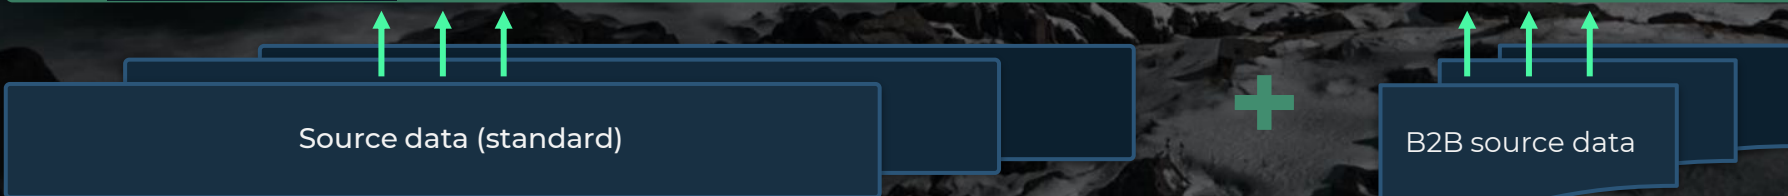

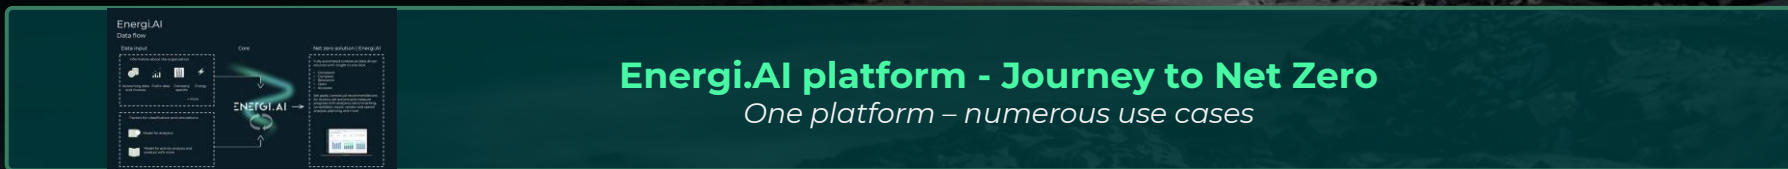

Building AI climate solutions for businesses to
actively **Cool The Planet**

We are here to put brakes on climate change.
Scaling green business building in the
decade of **Net Zero Actions**

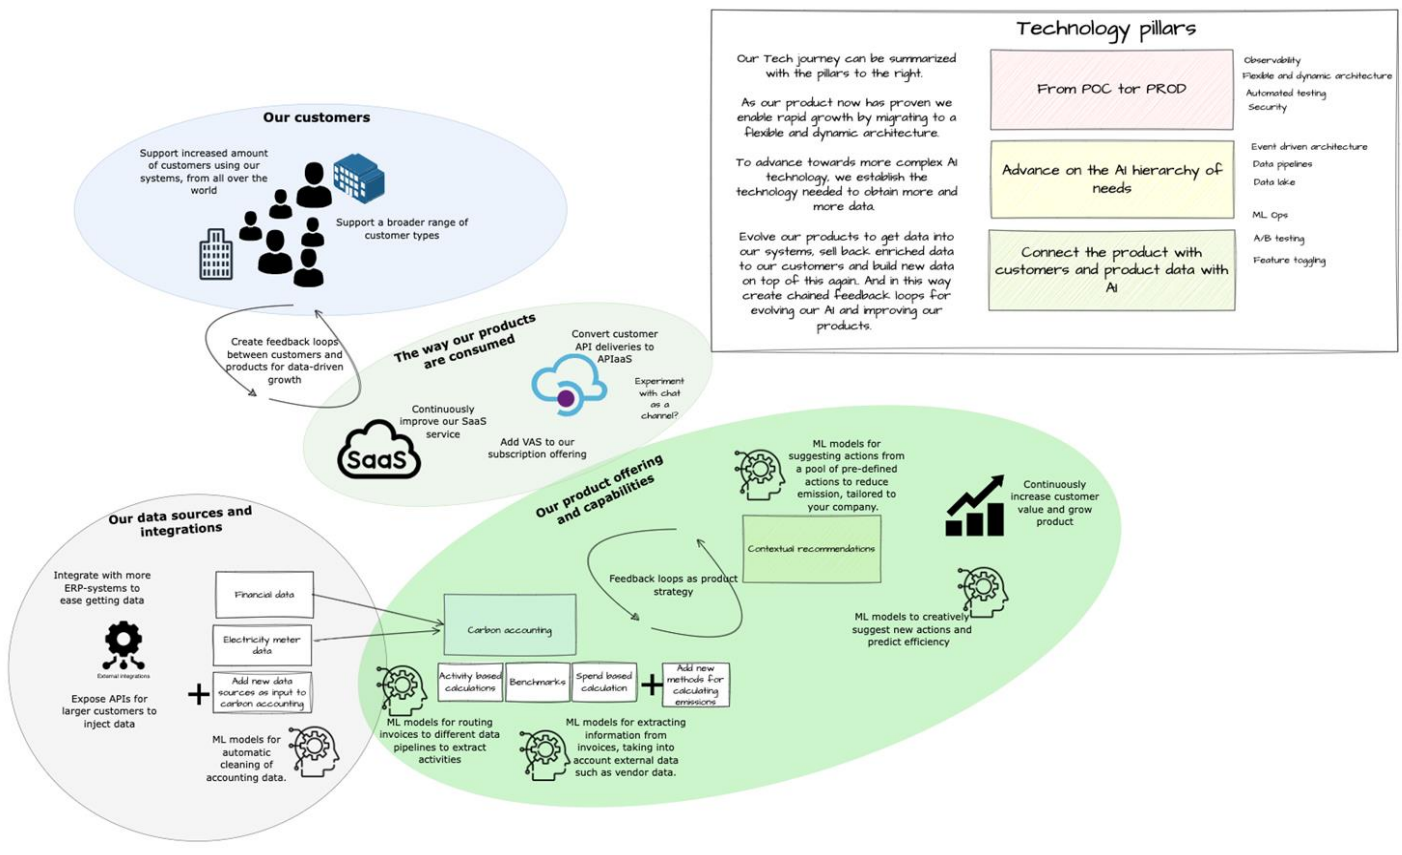

A data driven platform for Net Zero Actions

Energi.AI enables new business opportunities and models

AI / Machine learning is at the core of our tech-vision

Text-to-CO2 emission reduction

We use Chat-GPT to identify contextual recommendations for Net Zero Actions

Climate footprint based on injected data

01 Data collection through products

Inject information from data-sources

Suggest emission reduction measures

Contextual recommendations for Net Zero Actions

Create feedback loops between products to grow data set

02 Data prep

03 Model training

04 Evaluation

05 Productify AI model
